

# GALAXY HATCHERY MONITORING SYSTEM

The Galaxy hatchery monitoring system allow you to manage, program and control your entire hatchery from your office or remotely via a modem or broadband connection

- Controls hatchery functions, improves operating efficiencies and results in better hatchability and chick quality

- Easy to view screens provide detailed information and trend analysis to incubation performance
- Stage Programs available for different breeds and flock ages
- View and adjust current incubation conditions for temperature, humidity, damper or CO2 control
- Monitor and adjust environmental to maintain uniform temperatures

- Store data to perform detailed analysis over a period of time

- User-friendly, extremely flexible Windows based software

- Minimize operating costs
