Nests & Egg Collection System

## Two Belt 12-Hole Breeder Hen Nesting System for Broiler Breeders

### Well Designed:

Unique close-out system restricts hens from roosting in nests at night, keeping nests cleaner and preventing broody hens.

Nests are well ventilated, offering more comfort for your hens.

Convenient side belts allow for easy hand gathering in case of power outage.

No lips around bottom of nest on which litter can build up.

Bottom has open area in front to expel litter, preventing accumulation on belt.

Connector trays are self-cleaning with stainless steel covers for long life.

### Strong Construction:

Partitions are made of heavy duty plastic for long life.

Bottoms are supported by galvanized rods.

Our two belt nesting system is designed to make your operation more productive and efficient, with very little maintenance.

### Collector Features:

Collector drive unit has a direct drive gearbox, eliminating pulleys, belts, chains, etc. and making the unit easier to maintain.

Unit has variable speed feature. Simply turn a dial to change belt speed.

Drive unit utilizes a self-tightening pinch roller drive system with a spring-loaded belt slack take-up roller.

Height of unit is adjustable from 24 inches to 40 inches to fit most floor elevations. Legs telescope, making height adjustment quick and easy. Swivel feet accommodate uneven floors.

Collector drive unit and table come completely assembled. Just hook up belt and plug in.

Power: 120 volt A/C. Available for 220 volt A/C operation
